## About The Program

Caring Dads is an educational & counselling program that supports men who want to improve their parenting skills.

In a guided group setting, this program helps men acquire attitudes, beliefs, and behaviours that support healthy father-child relationships.

Participants will learn to recognize and avoid the use of controlling, intimidating and abusive actions due to the negative impact these behaviors have on children. They will develop skills for interacting with their children in healthy ways.

Acceptance into the program may be restricted by outstanding court matters that are likely to impact access to the participant's children.

## What can dads expect?

### Caring Dads will help participants to:

- Learn ways to improve their relationship with their children
- Understand the impact of their behaviour on their children
- Recognize their children's needs and put them first whenever possible
- Develop a healthier style of parenting

### What moms & kids can expect

Our staff will have occasional contact with the mother to:

- Ensure that she & the children are safe
- Provide information about services she may want to use
- Provide information about the Caring Dads Program

### What referring agencies can expect

Feedback regarding the dad's attendance and progress in the program will be provided to the referring agency.

## Just the facts

An orientation meeting is the first step

Then, join in ...

The group program is 16 weeks  
2 hours per session

In order to benefit from the program, fathers need to have regular contact with their children.

Participation may be voluntary, at the request of the Court, Probation, Children's Aid or another referring agency, or mandated.

While participants are registered in the program, our staff will have occasional contact with the mothers of the children and the referring agency.

Interpreters are provided, if required, at no cost.

## “What participants say about Caring Dads Program”

“Made me realize how much kids are impacted by how their parents act.”

“My relationship with my children has become much more open, stress-free and helps me to reflect daily on my behaviour and my children's needs.”
